POWER WASHERS™

FOUR EASY STEPS TO CLEANER HANDS

**STEP ONE:**
Wet your hands using warm water. This will make it easier to lather the soap and get all of the germs off!

**STEP TWO:**
Get some soap (either a bar or liquid soap). Lather it in your hands and scrub for twenty seconds. Don’t forget to scrub in between your fingers, your fingernails, and even the backs of your hands!

**STEP THREE:**
After scrubbing for twenty seconds, rinse all of the soap down the drain. Make sure to get all of the soap off. This will make sure that no germs are left behind on your hands!

**STEP FOUR:**
Dry your hands on a paper towel. Then, use it to turn the water faucet off. This will avoid recontamination and keep you clean and healthy!
