If You Take a Triangle ...

Name: ________________

If you take a triangle ...
...and add a square

...and add a rectangle
...and add a rhombus

...and add a circle
...and add another square,

...you can make a house!
Cut out these shapes and paste them together to make something. It doesn't have to be a house.
This is a booklet featuring various shapes, to encourage early learners to recognize and name some shapes, and to see that a “whole” can be made up of a collection of different shapes. To make the book, cut out the pages, stack them, and staple together on the left side. On the last page, children can cut out the shapes and paste them together (on construction paper) to make the house, or anything else they want.

I add FREE items often. Follow on TpT and Pinterest to get them as soon as they are listed.

If this activity download meets your expectations, I would be delighted if you would leave feedback here.
