This guide consists of all the articles I could find on baseball history published in history periodicals from 1980 through 1988. I’ve not included baseball fiction or criticism of baseball fiction. I have included some criticism of baseball non-fiction. I’ve left out SABR publications, which have been recently indexed. I’ve also left out such periodicals as The Sporting News and Sports Illustrated for obvious reasons. I’ve also omitted other publications that I do not have access to. An imperfect system to be sure, but the best I could do. I’m sure I’ve missed relevant articles, particularly those in local historical journals. If you know of any such omissions write me and I’ll put in the next volume. whenever that may be. I do hope to do this on a regular basis. In those instances where I have incomplete information, I’ve put down what I have.

A word about Baseball History. After two years and eight volumes as a quarterly, this periodical became an annual, with a target date of October. The first annual issue, called the Premier Edition, came out in December 1988, with, for whatever reason, a 1989 copyright date. I’ve dated articles from that issue as Premier Edition, with no date.
