Funding for the Development & Implementation of Genomic Medicine Training Modules

The National Human Genome Research Institute (NHGRI) announces the availability of funds to support the development and implementation of modules aimed at providing health care professionals with genomic medicine training. Genomic medicine topics include: clinical use of genomic data, genomic tests, analysis of clinical genomic data, pharmacogenomics, use of genomic information for preventive medicine, etc. For the purpose of this opportunity, health care professionals include physicians, physician assistants, nurse practitioners, nurses, genetic counselors, pharmacists, etc. Development of training materials and/or curriculum needs to be within the scope of the parent grant.

Application budgets are limited to $125,000 total costs per year. Applicants can request a maximum of two years of support.

Applications must be submitted to PA-18-591 by May 1, 2020.

This opportunity is available as an administrative supplement to Clinical & Translational Science Award (CTSA) institutions. It is available to Dell Med researchers in partnership with the CTSA at UT Health San Antonio. If interested, please reach out to Bob Clark, CLARKRA@uthscsa.edu for more information.
