Welcome to the Yale Health Allergy Department. Yale Health’s Allergy Department is for students who have Yale Health Hospitalization/Specialty Care coverage. Our department is staffed by two board certified allergists/immunologists, Florence Ida Hsu, MD, and Ryan Steele, DO, and highly qualified allergy nurses.

If you have already begun allergy immunotherapy and want to continue to receive allergy injections while studying at Yale University we need the following information to safely provide your allergy immunotherapy. Please make an appointment with your home allergist to request the following:

- Immunotherapy extract with proper labeling, including student’s name, date of birth, allergens present, and expiration date
- Shipping of your immunotherapy extract under cold storage
- A copy of your administration/injection record or flow sheet
- A copy of your allergy diagnoses and skin and/or rash testing results
- A copy of your immunotherapy prescription
- Yale Health Student Allergy Medical Treatment Plan completed and signed by your MD

**Immunotherapy Extract**

Your immunotherapy extract must be stored at the clinic.

If you plan to ship your immunotherapy extract please call 203-432-8797 for detailed instructions.

If you bring your immunotherapy extract with you, it must be refrigerated at all times.

**Allergy Injections**

**Call 203-432-8797** before you arrive on campus to schedule an initial appointment with the allergy nurse.

At your initial appointment, we will establish a schedule for your injections. Allergy injections are given by appointment on **Mondays, Wednesdays and Thursdays**.

We require all allergy patients to wait in the clinic for **30 minutes** after injections. All allergy patients with a history of reactions are required to carry an EpiPen® on the day of their injections. Please call us with any questions, 203-432-8797. We look forward to meeting you in the fall.

**Fees and Copays**

Students with Yale Health Hospitalization/Specialty Care coverage pay a $25 copay for visits with the allergist. Students who waive Yale Health Hospitalization/Specialty Care coverage are not eligible for these services.
Dear Doctor:

Yale Health has an allergy clinic for students who have begun allergy immunotherapy and who want to continue to receive allergy injections while they are studying at Yale University. Your patient has received information about our clinic and the steps they need to take to ensure a smooth transition from home to college.

If you want your patient to continue to receive allergy injections, please complete the attached medical information. It is important for you to know that we require all students with a history of reactions to carry an EpiPen® on the day of their allergy injections, so you may wish to prescribe this before the student arrives on campus. We also have a 30-minute waiting period following injections.

If you have any questions about our allergy clinic, please call 203-432-8797 and speak with one of us or any of our nurses. We are committed to working closely with you to ensure the safest allergy immunotherapy for your patient.

Very sincerely,

Florence Ida Hsu, MD
Allergy and Immunization

Ryan Steele, DO
