**SPRING COURSES**

**April**
- 6, Mon. | CEQA: A Step-by-Step Approach
- 17, Fri. | Tribal Water Law and Policy (1)
- 22, Wed. | Redesigning the Zoning Ordinance (1)
- 23, Thurs. | Sustainable Groundwater Management Act (1)
- 24, Fri. | Introduction to Geographic Information Systems (3)
- 30, Thurs. | Public Real Estate Transactions (1)

**May**
- 1, Fri. | CEQA: A Step-by-Step Approach (1)
- 6, Wed. | The General Plan in California (1)
- 7, Thurs. | Developing and Writing Effective CEQA Documents (2)
- 8, Fri. | California Wildfires: Strategies for Planning and Mitigation (1)
- 13, Wed. | Planning and Sustainability Information Session
- 15, Fri. | Animal Rescue in Disaster Planning (1)
- 21, Thurs. | Mitigation Measure Development and Monitoring (1)
- 28, Thurs. | Community Involvement and Communication in Planning (3)

**June**
- 3, Wed. | Addressing Climate Change Adaptation and Resilience in California at the Local Government Level (1)
- 10, Wed. | Development Agreements, Public-Private Partnerships and Redevelopment 2.0 (1)

**Show What You Know**

**Earn a Certificate or Professional Concentration to Boost Your Résumé**

For many of our students, earning a certificate or professional concentration has been the lift they needed to get a promotion or land a new job. Demonstrate your skills and proficiency with either a certificate in Land Use and Environmental Planning or a professional concentration in Geographic Information Systems.

STUDENT SPOTLIGHT
Peter Bird

PETER BIRD is an associate planner for the city of Shasta Lake in Northern California. Bird began his career at the city in the public works department, but discovered a calling to help his community grow. When an opportunity to join the planning department came up, he jumped at the chance. But he also realized he needed to supplement his degree in business and human resource management with specialized training in urban planning. Needing an education to join the planning department came up, he jumped at the chance. But he also decided to finish the certificate. Even with my obligations, I found that the schedule of the program was something I could do.

What did you think of the instruction?
Every single instructor was really good. There were so many different view points throughout the program—people from government agencies, developers, consultants and so on. You’re never just getting one side of the story, which was a nice benefit the program offered.

Would you recommend this program?
I would absolutely recommend the Land Use and Environmental Planning Certificate Program. The quality, exposure to other professionals and the flexibility were all great reasons to take these courses and earn my certificate.

Did you consider any other programs before choosing ours?
I was looking at online bachelor’s and master’s degrees in urban planning, but the cost and time requirements were prohibitive, so I looked at a number of other options. A previous planning director had taken the UC Davis program, so I enrolled in a few classes, enjoyed them and decided to finish the certificate. Even with my obligations, I found that the schedule of the program was something I could do.

May 13

CEGA: A Step-by-Step Approach
Clarity and deepen your understanding of CEGA and the implications it has for your organization, plan or project. Discuss the latest changes to the state CEGA guidelines, new case law and legislation.
May 1 - $400

The General Plan in California
Learn policies and best practices associated with general plan preparation, including how to scope and budget a project, hire consulting assistance as necessary and finish the project in an efficient and comprehensive manner.
May 6 - $360

Rescheduling and Writing Effective CEGA Documents
In this activities-based workshop, you will learn a step-by-step approach to writing CEGA documents, including outlining, section writing, peer review and reviewing project start-up packages and other materials.
May 7 • $500

Mitigation Measure Development and Monitoring
Learn how to develop and monitor enforceable mitigation measures for different types of projects in California. Focus on the legal basics and latest court cases on mitigation measures. Receive practical advice, examples and checklists for developing and monitoring mitigation measures.
May 15 • $360

Community Involvement and Communication in Planning
Learn the theoretical background and the hands-on practice of involving stakeholders in urban planning, design decisions and policymaking. Students will engage in simulated negotiations and examine how to determine the right type of public process for a given situation.
May 19 June 19 • $765

Development Agreements, Public-Private Partnerships and Redevelopment 2.0
This course will discuss public-private partnerships and the legal and practical considerations impacting how cities, counties and private developers can collaborate on matters involving economic development. Examine techniques such as development agreements, infrastructure financing districts, special taxes and assignment of possible collaboration strategies for moving forward both public and private agendas.
June 3 • $360

Toils and Techniques for Streamlining NEPA
This workshop will provide a comprehensive review of existing statutes, presidential executive orders, rules and agency implementing regulations and guidance that pertain to NEPA streamlining. Focused and provided by a detailed overview of techniques and best practices for streamlining the NEPA process.
June 10 • $600

Geographic Information Systems
Introduction to Geographic Information Systems
In this hands-on workshop you will learn terms and concepts, available systems, data sources and design and policy decisions that must be addressed prior to implementation of a GIS project. You’ll then dive into ArcGIS to get a basic working knowledge of the platform and a concrete sense of the planning and design work involved in using GIS.
April 22-24 • $725

GIS and Tools for Post-Emergency Analysis
This course has been teaching new-to-moderate-level GIS professionals how to utilize spatial data and maps to assist in disaster response and recovery operations. Through lecture and hands-on course exercises, you will learn how to prepare and use Collector for ArcGIS—mobile data collection app—and utilize data gathered in Collector to better inform stakeholders about current, on-the-ground conditions.
April 30 May 1 • $600

Resiliency
New California Wildfires: Strategies for Planning and Mitigation
With the increasing strength and frequency of fires in California, it is critical that we address some contributing factors and develop strategies to mitigate their future occurrence. The course will explore the role of various agencies, how mitigation plans work with prevention and preparedness, rural versus urban challenges and more.
May 8 • $360

New Animal Rescue in Disaster Planning
As California continues to experience more wildfires and flooding, our communities are forced to adapt how they plan and respond to natural disasters. This hands-on course will focus on the theory and practice of crisis management as it pertains to large and small animals.
May 15 • $360

NEW Addressing Climate Change Adaptation and Resilience in California at the Local Government Level
This course will provide an overview of the federal, state, local (of course) and local context for climate change and resilience, and build capabilities around implementing programs and policies, developing RFPs, considering short- and long-term funding and how to create a sustainable resilience initiative at the local level.
May 28-29 • $525

Water Resources
Tribal Water Law and Policy
This class will cover the legal foundation and policies behind Indian water rights and how those rights fit within California’s water allocation system. Topics will include litigation, congressionally approved water rights, settlements and more.
Feb. 6 • $360

Sustainable Groundwater Management Act
This course will delve deeply into the Sustainable Groundwater Management Act and its requirements; help you understand groundwater law and hydrology, and walk you through creating viable implementation strategies and developing a robust sustainability plan.
April 22 • $360

Understanding the Sacramento-San Joaquin Delta: An Overview of Delta Governance and Regulation
Gain a comprehensive overview of the Sacramento-San Joaquin Delta and an understanding of its significance to California in this introductory course. Explore all aspects of the Delta, past and present, including current plans to improve and protect the Delta water system, its built environment, infrastructure, hydrology, ecosystem, fish and wildlife, land use and water project operations.
April 24 • $360

Also of Interest
Fundamental Conflict Resolution Skills
Practice facilitation and mediation skills and techniques required for successful individual, group and team meetings. Learn strategies to minimize and address conflict in difficult conversations and with difficult people. Explore tools to assess and engage diverse community interests and participate in a meaningful and productive way. March 4, 11 and 18 • $795
