Jason’s day is full of teachers, classes, and assignments. He also has an after-school job. Jason works hard to earn money and keep up with his studies. But in the past few weeks he has been working too many hours and not doing his homework or passing his tests.

When Jason first started looking for a job he was very excited. He put together a resumé to help him acquire his position. He thought having a job would teach him about responsibility as well as help him earn some extra cash.

Like Jason, many students think that having a part-time job is a good thing. They get a chance to make new friends with their coworkers. Their bosses and coworkers perceive them as responsible adults. They start to learn the value of money and to save up for the things they want, like clothes, video games, or even a car. Some even help out with their family’s needs. These are all benefits of having an after-school job.

Then there are those who think students should not be working while they are in school. Jason could not sustain his good grades because of work. Some people claim that students who work do not do as well in school because they don’t have as much time to study or do assignments. These students are also tired more often and do not pay as much attention in class.

What do you think about this? Are after-school jobs helpful or harmful to middle and high school students?
USE THE FOCUS WORDS

resumé (noun) a document summarizing experience and qualifications

Sample Sentence: Most high school students learn to write a resumé that includes all of their work and volunteer experiences, as well as academic achievements.

Turn and Talk: What are two things that you hope to be able to include on your resumé when you are a high school senior?

responsibility (noun) duty; the ability to act independently

Sample Sentence: Jason thought having a job would teach him about responsibility as well as help him earn some extra cash.

Turn and Talk: Where have you learned more about responsibility: in school or at home? Explain.

acquire (verb) to gain

Sample Sentence: Jason put together a resumé to help him acquire a job.

Turn and Talk: How do you plan on acquiring the experience and skills necessary for building a strong resumé?

perceive (verb) to sense or be aware of; to view in a certain way

Sample Sentence: When students get a job, their bosses and coworkers perceive them as responsible adults.

Turn and Talk: Do your teachers perceive you as responsible? Why or why not?

sustain (verb) to keep up

Sample Sentence: As it turns out, Jason could not sustain his good grades while working.

Turn and Talk: What was the last book that sustained your interest from beginning to end?
Many students perceive an after-school job as a responsibility that will help them build their resumé, acquire new skills, and earn money. But new responsibilities affect the amount of time students have for other things. Can students sustain their dedication to schoolwork and take on a job after school at the same time?

Option 1: According to the Bureau of Labor Statistics, students who have an after-school job spend an average of 42 fewer minutes per day on schoolwork than students who don’t work. If the school year is 180 days, how many more hours per year would the average non-working student spend on schoolwork than the average student with an after-school job?

A. 7,560 hours
B. 300 hours
C. 244 hours
D. 126 hours

Option 2: According to the Bureau of Labor Statistics, students who have an after-school job spend an average of 42 fewer minutes per day on schoolwork than students who don’t work. If we let \( m \) = the number of minutes the average non-working student spends on schoolwork each day, write an algebraic expression that shows the number of minutes the average student with an after-school job spends on schoolwork in a 5-day week.

\[ 5(m - 42) \]

Discussion Question: According to the Bureau of Labor Statistics, working students spend 42 fewer minutes on schoolwork, 42 fewer minutes on fun activities, and 36 fewer minutes on sleep each day. Do you perceive any of these statistics as a problem? Whose responsibility is it to make sure that kids sustain focus on their schoolwork and acquire healthy habits like getting enough sleep?
The students in Ms. Kahn’s class are talking about after-school jobs.

“I do some babysitting occasionally during the week, and almost every weekend,” says Kareema, “but I don’t know how I would cope with the responsibility of having a regular job every weekday. By the time I finish soccer practice, it’s almost dinner time, and then I’ve got to get my homework done before maybe watching a little TV and going to bed. Where is there time to work a regular job?”

“I enjoy my job,” says Sergio. “I get my homework done right after school, then after dinner I go work for three hours at my aunt’s video rental store. It feels good to help her out, and it’s fun to talk with the customers about movies, even though I end up not having as much time as I used to for watching movies myself. Anyway, it’s great to acquire some spending money for the weekends.”

“Money is important,” says Viet Ly. “But I worry about how my older brother’s job affects him. He’s 17, and he works an eight-hour shift after school three days a week, plus another eight hours on Saturday. He’s saving most of his wages for college, but ever since he turned 16 and started his job, he’s had a hard time sustaining good grades. He just seems rushed and tired all the time.”

Sergio nods. “Yeah, I think I’d have a hard time keeping up with my school responsibilities if I spent that much time on the job,” he says. “I guess it’s like Goldilocks and the Three Bears: I don’t want too much work or too little work. I like it just right.”

“But how much is just right?” says Viet Ly.

“Good question,” says Ms. Kahn. “Let’s see if we can find any research data on after-school jobs and academic performance.”

After doing an online search, Ms. Kahn’s students find the following graph summarizing the results of some research on the relationship between after-school employment and grade point averages for middle school and high school students.

This graph is generalized (not exact) since it is not marked off in numerical units for grade point average or hours worked. It shows an “inverted U” relationship between average GPA and hours worked, peaking at around 15 hours of work.

Discuss with a partner where you think 15 hours would be located on this graph.

What general idea is the graph trying to communicate?

Having about 15 hours of after-school employment is associated with the best average grades. Having no work, or especially too much work, is associated with having lower grades.

Assuming this graph is a fair representation for the studies it summarizes, what do you think might cause this “inverted U” relationship between hours worked and average GPA for students?

Working might make some students feel more confident and responsible, and might help them learn to organize their time better, while students who work too much may be overwhelmed. Or maybe students who already get good grades also choose to work moderate hours.
ARE
AFTER-SCHOOL JOBS HELPFUL OR HARMFUL FOR MIDDLE AND HIGH SCHOOL STUDENTS?

DEBATE THE ISSUE
Pick one of these positions (or create your own).

A
☐ After-school jobs are harmful to students.

OR

B
☐ After-school jobs are helpful to students.

OR

CREATE YOUR OWN
