Removing Project Aliases in 4HOnline

Login to your county manager account and go to your listing of project aliases by clicking on the icon in the tool bar.

Your listing of project aliases will come up and you will have to remove them one by one. Leave your county only aliases, but remove the alias from the State Level projects.

To remove the alias from the State Level projects, click on the edit button next to the project you want to change.
Once the project you want to change is open, click on the delete button. This will only remove the alias for the project and will NOT impact the enrollments which are already in the system.
