LEARN FROM THE BEST IN THE INDUSTRY! UC Davis Continuing and Professional Education offers the Sacramento region’s premier training in occupational health and safety. Through individual courses or our certificate program, learn new skills to create and maintain a safer work environment for you and your coworkers. We can’t wait to see you in class!

Since you were new to the field, what was one of the biggest challenges you faced as you went through the program?

The biggest challenge was just making the decision to develop myself. I had to stand back and say, “I need to be better. How can I do that?”

What was one of the most valuable things you got out of the program?

I’d have to say confidence. I had opinions about how our site should run safely, but I didn’t have the background to know if these ideas were valid or not. The UC Davis Continuing and Professional Education instructors and the bond I formed with my classmates created an environment where I felt comfortable sharing my ideas and receiving feedback.

Show What You Know

Earn Your Workplace Health and Safety Manager Certificate

Gain the expertise you need in today’s work environment by expanding your knowledge of current health and safety issues and regulations with our Workplace Health and Safety Manager Certificate Program. Benefit from a UC-quality education as you learn practical information from and network with fellow professionals in the safety field. Whether you’re new to workplace safety or have some experience but want to brush up on the latest standards and best practices, our nine-course program is a convenient and affordable option for your safety training needs.

Health and Safety

Industrial Safety Hazard Control

Expand your understanding of industrial safety hazard control by learning to identify and assess hazards in the workplace and strategies for removing them. Examine case studies and learn from the field, then brainstorm potential solutions to real-life problems. Jan. 29-31 • $685

Pitfalls and Oversights of Designing Fire Protection Systems

Learn code provisions and national standards of fire protection designs for fire alarms, fire sprinkler systems, standpipes, fire pumps, smoke control systems and public safety communication systems. Through lecture and case studies, gain an understanding of practical uses of these features, including design flaws. Feb. 20 • $360

Incident Investigation Techniques

Acquire the knowledge, practical skills and tools you need to conduct incident investigations with an in-depth examination of topics, such as the principles of incident investigation, investigation planning and preparation, tools and techniques for investigation and effective real-world corrective actions. Feb. 27-28 • $595

Introduction to Industrial Hygiene

Learn the science of industrial hygiene, including methods to anticipate and recognize such hazards, measuring and evaluating exposures to these agents, and how exposure can be controlled through personal protective equipment and engineering methods. March 11-12 • $595

Industrial Hygiene Sampling and Monitoring Instruments

Gain an understanding of the theories, techniques and procedures associated with the use of instruments to measure air contaminants and physical agents, such as noise, heat and related exposures. Through lecture and hands-on exercises, learn methods and procedures for using common industrial hygiene monitoring instruments, sample collection and laboratory analysis and interpretation of results. March 18-19 • $595

Hazardous Materials Management

Health and Safety Refresher for Hazardous Waste Workers—8 Hours

This course, which meets requirements established by OSHA for training under the Hazardous Waste Operations and Emergency Response Standard (HAZWOPER) 29 CFR 1910.120(e) (8) and the equivalent California Standard T8 CCR 5192 (e) (8), provides hazardous waste-site employees and supervisors with the annual refresher training in health and safety for hazardous waste workers. Feb. 7 • $225
